

Legume Seeding

Crop Establishment

Vineyards/Orchards

*Leaves all other limes for DUST!*

# Calciprill®

## *Why use Calciprill®?*

- Calciprill is much finer than standard aglime
- Accurate placement with minimal loss to dust drift
- Easy to use with your own spreader
- Can be sown or spread with seed or fertiliser, direct drilled or applied by air seeder
- Good source of calcium, essential for plant growth
- Annual application on short term leased country can save money due to faster pH adjustment
- Banding allows for cost efficiencies over aglime
