TO THE FARMER.

DEBENHAM AUSTRALIA are hosting their annual BEST PRACTICE field day in the Western District this year, at Koroit. The purpose is to share ideas and systems used on this farm, to achieve long term wealth creation. Harper and Onagh purchased their farm in 2007, they have managed it themselves since 2011. With Global experience in dairying and finance, the Kilpatrick's are also involved in finding employment for international Agriculture Students in Australia.

The day brings together not only like-minded FARMERS, but industry representatives and a diverse group of speakers. With a challenging year forecast, we believe communication and planning are crucial to moving on from a tough financial climate, by working to your strengths - *ready to grow*
